

More Coverage. More Confidence. Better Outcomes.

As an interpreting physician trained in neurophysiology, you'll employ a rare skill set to provide professional oversight of neurophysiologists in the operating room. You'll be an important contributor to surgical excellence and positive patient outcomes.

Interpreting physicians trained in neurophysiology can possess the unique distinction of specializing in intraoperative neuromonitoring. That's what differentiates NNI: our commitment to retain these experts in the field of neurodiagnostics and neuromonitoring.

CLINICAL COLLABORATION AND CASE FLEXIBILITY:

- Work alongside a pool of largely CNIM-certified clinical staff
- Receive practice benefits from shared learning within the IOM industry
- Flexible work environment—the level of commitment is entirely yours to determine

MONITORING A BROAD SPECTRUM OF SURGICAL PROCEDURES:

- Neurological Surgery
- Orthopedic Surgery
- Cardiovascular/Cardiothoracic Surgery
- Otolaryngology Surgery
- Urological Surgery

Supplement Your Income

Generate substantial incremental income without hindering your current practice
